# Industrial Applications

## Metallurgical industry

Offering a wide range of installation and signal types for the metallurgical industry, And provide customized product solutions

- Full range of product options, including incremental and absolute encoders;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- With standard and heavy duty product selection, can meet the environmental application requirements of different stations;
- Protection class IP66 / IP67, -40 ... +80 °C wide temperature range application.

## Lifting industry

Systematic product solutions for the lifting industry, including heavy-duty incremental encoders for speed control and absolute encoders for stroke positioning. The product has the signal output interface matching various kinds of host computer systems, and excellent mechanical damage resistance and good anti-interference performance.

- Full range of product options, including incremental and absolute encoders;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- With standard and heavy duty product selection, can meet the environmental application requirements of different stations;
- Protection class IP66 / IP67, -40... +80 °C wide temperature range application;
- We can provide customized product solutions according to the actual application requirements.

## Glass machinery industry

Systematic product solutions for the glass machinery industry, including incremental encoders for speed control and absolute encoders for stroke positioning. It has the signal output interface that matches all kinds of upper computer systems, and the product features of high precision and high stability ensure the realization of flexible control of the system.

- Full range of product options, including incremental and absolute encoders;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- Protection class IP66 / IP67, -40... +80 °C wide temperature range application;
- We can provide customized product solutions according to the actual application requirements.

## CNC machine tool

Products for the CNC machine tool industry include incremental encoders for speed control and absolute encoders for position positioning, and can provide customized services according to customer needs.

- Full range of product options, including incremental and absolute encoders;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- Protection class IP66 / IP67, -40... +80 °C wide temperature range application;
- We can provide customized product solutions according to the actual application requirements.

# Industrial Applications

## Servo industry

The servo industry needs cost-competitive signal feedback systems to provide high-efficiency, compact encoders for servo systems. The ELCO industrially standardized servomotor encoders and the BISS-C protocol encoders are reliable and compact, providing extremely accurate speed and position feedback signals for high-performance servo systems.

- Features high precision and low velocity fluctuation;
- Ensure high-speed servo system achieve perfect control;
- Adopts compact structure design to meet the needs of compact space;
- Special chip processing technology, reduce torque ripple, improve the dynamic performance of the system;
- BISS-C protocol, two-way synchronous communication, the maximum communication rate up to 10 MHz;
- NRZ protocol based on 485 hardware interface, can realize alarm and built-in EEPROM function.

## Wind power industry

We provide systematic product solutions for the wind power industry, including heavy-duty incremental encoders for speed control and absolute encoder products for stroke positioning. The products have the signal output interface matching various types of upper computer systems and excellent mechanical damage resistance.

- Protection class IP66/IP67, -40... +80 °C wide temperature range application;
- Heavy-duty product design, can meet different stringent environmental application requirements;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP.
- A variety of product lines to provide overall encoder solutions for the wind power industry;
- Good anti-interference performance to meet the needs of long-distance transmission on site;
- We can provide customized product solutions according to the actual application requirements.

## Logistics industry

Provide systematic product solutions for the logistics industry, including for incremental encoders for speed control and absolute encoders for stroke positioning are produced. The product has the signal output interface to match all kinds of upper computer systems and excellent resistance to mechanical damage.

- Protection class IP65 / IP67, -40... +80 °C wide temperature range application;
- Industrial-grade product design, stable operation in different site environments;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP / Profinet, etc.
- A variety of product lines to provide overall encoder solutions for the logistics industry;
- Good anti-interference performance, effectively resist all kinds of electrical interference on site;
- We can provide customized product solutions according to the actual application requirements.

## Textile industry

Provide systematic product solutions for the textile industry, including for incremental encoders for speed control and absolute encoders for stroke positioning are produced. The product has the signal output interface to match all kinds of upper computer systems and excellent resistance to mechanical damage.

- Protection class IP66 / IP67, -40... +80 °C wide temperature range application;
- Industrial-grade product design, stable operation in different site environments;
- Standard products with shaft type, shaft sleeve type installation mode selection, convenient on-site installation and debugging;
- Variety signal types, including HTL / TTL / SSI / Profibus-DP, etc.
- A variety of product lines to provide the overall encoder solution for the textile industry;
- Good anti-interference performance, effectively resist all kinds of electrical interference on site;
- We can provide customized product solutions according to the actual application requirements.

# Incremental encoder EI40 Series

## Mechanical load

Large bearing span design, with outstanding mechanical load performance, can effectively improve the impact resistance of the shaft end.

## Electrical system

The modular power supply conversion design combined with the highly integrated drive circuit effectively reduces the temperature rise of the product and ensures the stable signal output of the product when the ambient temperature rises.

## Side cabling

Side cabling design makes it possible to wire out at any Angle in the 360° range, greatly reducing the requirements for installation space and line laying.

## Circuit protection

Product integrated power supply overvoltage, reverse connection and channel short circuit protection design, effectively protect the damage of wrong operation to the product, greatly improve the efficiency of equipment debugging and reduce maintenance costs.

## Cast housing

Zinc alloy cast housing small encoder products, with excellent mechanical damage resistance.

## Protection class

Double bearing skeleton seal structure and ring pressure housing assembly process design, to achieve up to IP67 protection level, sealing performance is much better than the traditional screw connection.

## Signal processing

Using the industry's leading optical diode acquisition technology, to achieve high-precision, high-stability signal transmission, suitable for positioning and synchronization control system applications.

Mechanical parameters	
Shaft diameter (mm)	Ø 6g6 (EI40A)    Ø 6 / Ø 8H7 (EI40P)
Housing diameter (mm)	Ø 40
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	60 / 30
Operating temperature (°C)	-20 ... +85
Protection class	IP66 / IP67
Type of connection	Cable
Resolution	5000 ppr
Electrical parameters	
Supply voltage (V DC)	5, 10 ... 30
Pulse frequency (kHz)	300
Output circuit	HTL / TTL
Product features	Metal housing, high resolution, high protection level, signal transmission stability, high resistance to electromagnetic interference
Applicable industries	Glass machinery, paper making equipment, printing equipment, textile machinery, machine tool equipment

# New generation compact incremental encoder EC50 Series

## The installation method is highly compatible

The product adopts 50mm shape design, compatible with 58mm standard flange installation needs, providing 6...15mm axle diameter selection, can cover the field needs of light industry.

## Compact shape design

The minimum size of the shaft product is only 37mm, and the minimum thickness of the shaft sleeve product can achieve 44.7mm greatly reduce the demand for installation space, which is a system that pursues mechanical costs Design the best choice.

## Effective circuit protection design

Product integrated power supply overvoltage, reverse connection and channel short circuit protection design, effectively protect the damage of wrong operation to the product, greatly improve the efficiency of equipment debugging and reduce maintenance costs.

## Diversified forms of product output

Products provide a variety of output forms, to provide industry customers with the best product configuration, including 5-pin -M12 connector output product matching connector to provide customers with cost-effective product solutions.

## High sealing grade structure design

Products with high hardness of zinc alloy casting housing can effectively protect external mechanical damage, with double bearing skeleton seal design to achieve up to IP67 protection level, can adapt to all kinds of harsh conditions.

## Indicator lamp design

The product comes with power supply indicator to improve the convenience of on-site debugging and troubleshooting, and the high-brightness LED indicator greatly facilitates on-site inspection and daily maintenance.

## High precision, high stability signal processing technology

The product adopts highly stable optical diode acquisition technology, which can realize 5000ppr signal output, and matches with IC-Hause drive circuit technology to ensure stable signal transmission of the product, suitable for positioning and synchronization control system.

## Wide range of ambient temperatures

Ambient temperature -40 ... +85 °C , IP67 protection level, can ensure the equipment in different regions, different environmental temperatures, different climate conditions of stable operation.

Mechanical parameters	
Shaft diameter (mm)	Ø 6 / Ø 8 / Ø 10 / Ø 12g6 (EC50A) Ø 6 / Ø 8 / Ø 10 / Ø 12 / Ø 15H7 (EC50P)
Housing diameter (mm)	Ø 50
Max. Speed (rpm)	6000
Load capacity (radial / axial) [N]	80 / 40
Operating temperature (°C)	-40 ... +85
Protection class	IP65 / IP67
Type of connectionCable	Cable / connector
Resolution	5000 ppr
Electrical parameters	
Supply voltage (V DC)	5 ... 30
Pulse frequency (kHz)	300
Output circuit	HTL / TTL
Product features	Metal housing, high resolution, high protection level, signal transmission stability, high resistance to electromagnetic interference
Applicable industries	Glass machinery, paper making equipment, printing equipment, textile machinery, machine tool equipment

# Industrial Ethernet protocol absolute multiturn encoder

## Mechanical gear multiturn design

The multiturn part adopts mechanical gear structure design, which effectively improves the anti-interference ability of the product and ensures the stable operation of the product.

## Standard industrial Ethernet protocol

It can provide standard industrial EtherNet PROFINET IO/RT and EtherNet/IP interfaces, the maximum transmission rate can be up to 100 Mbits/s, and various parameters can be configured through software to facilitate customer debugging.

## Debug status at a glance

Can check the input-output communication and power supply of the encoder in real time by viewing the LED status indicator adapted to the back cover.

## Various installation methods

Various installation methods are available to meet various installation design requirements.

## Standard outlet design

Standard M12 connector design for fast, error-free connections in the field.

## Excellent mechanical performance

Unique mechanical structure design, ensure excellent mechanical load performance, combined with IP65 high protection class, adapt to various working conditions.

Mechanical parameters	
Shaft diameter (mm)	Ø 6 / Ø 10g6 (shaft)    Ø 8 / Ø 10 / Ø 12H7 (hollow shaft)
Housing diameter (mm)	Ø 58
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	80 / 40
Operating temperature (°C)	-20 ... +80
Protection class	IP65
Type of connection	Cable
Resolution	resolution 13 bits, revolution 12 bits
Electrical parameters	
Supply voltage (V DC)	10 ... 30
Pulse frequency	100 Mbits/s
Output circuit	PROFINET IO/RT    EtherNet/IP    EtherCAT
Product features	Standard industrial Ethernet protocol, metal housing, high resolution, high protection level, M12 connector for fast connection
Applicable industries	Automobile manufacturing, metallurgy industry, rubber and plastic industry, machine tool equipment

# Servo absolute multi-turn encoder

Special chip processing technology helps the servo drive system to reduce torque ripple and improve the dynamic performance of the system

Set high precision, high speed two features in one, help high-speed servo system to achieve perfect control

BISS-C protocol, which does not involve development cost in application, two-way synchronous communication, and the maximum communication rate can reach 10MHz

The compact structure design greatly reduces the installation space requirement

NRZ protocol based on 485 hardware interface, hardware interface for power supply and communication line, can achieve alarm reading and built-in EEPROM function

High precision optical sensing technology

Single turn 25bits

Muti-turn 16bits

Mechanical parameters	
Shaft diameter (mm)	Ø 9 - 1:10 cone shaft
Housing diameter (mm)	Ø 48
Max. speed (rpm)	6000
Load capacity(radial/axail) [N]	50 / 25
Operating temperature (°C)	-20 ... +85
Protection class	IP54
Type of connectionCable	Cable
Resolution	resolution 25 bit, revolution 16 bit
Electrical parameters	
Supply voltage (V DC)	5
Pulse frequency (Hz)	2.5 M
Output circuit	NRZ
Product features	Plastic housing, good compatibility, 9 mm through hollow shaft, high resolution
Applicable industries	Servo

# Incremental Encoder

- High sealing grade structure design
- Advanced double bearing structure, excellent mechanical load performance
- Has over current and short circuit protection to ensure the safety of product application
- Multi-resolution optional, excellent transmission distance
- Diversified forms of product output
- Large axle sleeve products are easy to install and save installation space

## Picture

Topydic small shaft incremental encoder EI40A

## Mechanical Parameters

Shaft diameter (mm)	Ø 6g6
Housing diameter (mm)	Ø 40
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	60/100
Operating temperature (°C)	-20 ... +85
Protection class	IP66 standard, IP67 optional
Type of connection	Cable
Max. resolution	5000 ppr

## Electrical Parameters

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Output circuit	TTL / HTL ...
Product features	Metal housing
	High protection degree
	Anti-electromagnetic interference

Topydic small hollow shaft incremental encoder EI40P

Shaft diameter (mm)	Ø 6H7 / Ø 8H7
Housing diameter (mm)	Ø 40
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	60 / 100
Operating temperature (°C)	-20 ... +85
Protection class	IP66 standard, IP67 optional
Type of connection	Cable
Max. resolution	5000 ppr

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Output circuit	TTL / HTL ...
Product features	Metal housing
	High protection degree
	Anti-electromagnetic interference

Topydic series shaft incremental encoder EC50A

Shaft diameter (mm)	Ø 6 / Ø 8g6
Housing diameter (mm)	Ø 50
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	80 / 40
Operating temperature (°C)	-40 ... +85
Protection class	IP67
Type of connection	Cable/connector
Max. resolution	5000 ppr

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Output circuit	TTL / HTL ...
Product features	Metal housing
	High protection degree
	Anti-electromagnetic interference

Topydic series hollow shaft incremental encoder EC50P

Shaft diameter (mm)	Ø 6/Ø 8/Ø 9/Ø 10H7
Housing diameter (mm)	Ø 50
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	80 / 40
Operating temperature (°C)	-40 ... +85
Protection class	IP67
Type of connection	Cable / connector
Max. resolution	5000 ppr

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Output circuit	TTL / HTL ...
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

Picture	Mechanical Parameters	Electrical Parameters		
<p>Topydic series shaft incremental encoder EI58A</p> 	Shaft diameter (mm)	Ø 6 / Ø 8 / Ø 9 / Ø 10g6	Supply voltage (V DC)	10 ... 30
	Housing diameter (mm)	Ø 58	Pulse frequency (kHz)	300
	Max. speed (rpm)	6000	Output circuit	TTL / HTL ...
	Load capacity (radial / axial) [N]	120 / 60	Product features	Metal housing
	Operating temperature (°C)	-20 ... +90		Good compatibility
	Protection class	IP64 (IP66 optional)		High protection degree
	Type of connection	Cable / connector		High resolution
	Max. resolution	5000 ppr		Suitable for measuring angle
<p>Topydic series hollow shaft incremental encoder EI58P</p> 	Shaft diameter (mm)	Ø 8 / Ø 10 / Ø 12 / Ø 14 / Ø 15H7	Supply voltage (V DC)	10 ... 30

	Operating temperature (°C)	-20 ... +80		compact structure
	Protection class	IP54		Anti-electromagnetic interference
	Type of connection	Cable / connector		Suitable for heavy electric
	Max. resolution	5000 ppr		machinery

# Absolute Encoder

- Parallel, serial port, analog port available
- Industrial EtherNet PROFINET/IO, EtherNet/IP, and EtherCAT interfaces
- Fieldbus PROFIBUS-DP, CANopen, DeviceNet
- Shaft type, hollow shaft type installation method is optional, with a variety of European standard flanges
- Up to 19bits in single-turn resolution and 31bits in multi-turn resolution
- offers mechanical and electronic multi-turn measurement technology,
- Excellent mechanical properties to meet the stringent requirements of various industrial sites

## Picture

Absolute singleturn encoder  
EAC50A

## Mechanical Parameters

Shaft diameter (mm)	Ø 6g6 / Ø 8g6
Housing diameter (mm)	Ø 50
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	40 / 80
Operating temperature (°C)	-20 ... +80
Protection class	IP66
Type of connection	Cable
Max. resolution	10 bits

## Electrical Parameters

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Output circuit	PNP / NPN
Product features	High resolution
	High protection degree
	Die-cast housing, compact structure
	Excellent mechanical
	structure properties

Absolute singleturn encoder  
EAC58

Shaft diameter (mm)	Ø 6 / Ø 8 / Ø 9 / Ø 10H7
Housing diameter (mm)	Ø 58
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	120 / 60
Operating temperature (°C)	-20 ... +80
Protection class	IP65
Type of connection	Cable / connector
Max. resolution	8192 (13 bits)

Supply voltage (V DC)	10 ... 30
Output circuit	SSI and parallel
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

Analog 4 ... 20 mA singleturn  
encoder EAS58

Shaft diameter (mm)	Ø 6 / Ø 10g6
Housing diameter (mm)	Ø 58
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	120 / 60
Operating temperature (°C)	-40 ... +80
Protection class	IP65
Type of connection	Cable / connector
Max. resolution	8192 (13 bits)

Supply voltage (V DC)	10 ... 30
Output circuit	Analog 4 ... 20 mA
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

ProfiNet absolute singleturn  
encoder PNC50

Shaft diameter (mm)	Ø 6g6 / Ø 10g6
Housing diameter (mm)	Ø 50
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	120 / 60
Operating temperature (°C)	-20 ... +80
Protection class	IP65
Type of connection	Cable / connector
Max. resolution	65536 (16 bits)

Supply voltage (V DC)	10 ... 30
Pulse frequency (Hz)	10 M
Output circuit	ProfiNet
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

# Absolute Encoder

- Parallel, serial port, analog port available
- Industrial EtherNet PROFINET/IO, EtherNet/IP, and EtherCAT interfaces
- Fieldbus PROFIBUS-DP, CANopen, DeviceNet
- haft type, Hollow type installation method is optional, with a variety of European standard flanges
- Up to 19bits in single-turn resolution and 31bits in multi-turn resolution
- offers mechanical and electronic multi-turn measurement technology,
- Excellent mechanical properties to meet the stringent requirements of various industrial sites

## Picture

EtherCAT absolute multiturn encoder EAM58-EC

## Mechanical Parameters

Shaft diameter (mm)	Ø 6 / Ø 10g6 / Ø 12 / Ø 15H7
Housing diameter (mm)	Ø 58
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	160/80
Operating temperature (°C)	-40 ... +80
Protection class	IP65
Type of connection	Connector
Max. resolution	4096 / 8192 (25 bits)

## Electrical Parameters

Supply voltage (V DC)	10 ... 30
Output circuit	EtherCAT
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

ProfiNet absolute multiturn encoder PNM50

Shaft diameter (mm)	Ø 6 / Ø 10g6 / Ø 8 / Ø 10H7
Housing diameter (mm)	Ø 58
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	160 / 80
Operating temperature (°C)	-40 ... +80
Protection class	IP65
Type of connection	Connector
Max. resolution	4096 / 8192 (25 bits)

Supply voltage (V DC)	5 ... 30
Output circuit	ProfiNet
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

Incremental absolute double output multiturn encoder EAM100

Shaft diameter (mm)	Ø 20H7 / Ø 25H7
Housing diameter (mm)	Ø 100
Max. speed (rpm)	3000
Load capacity (radial / axial) [N]	160 / 80
Operating temperature (°C)	-40 ... +80
Protection class	IP65
Type of connection	Cable/connector
Max. resolution	4096 / 4096 (24 bits)

Supply voltage (V DC)	10 ... 30
Output circuit	Profibus-DP
Product features	Metal housing
	Standard flange
	High protection degree
	High resolution
	Suitable for measuring angle

Standard magnetolectric absolute multiturn encoder EAM36

Shaft diameter (mm)	Ø 6f7
Housing diameter (mm)	Ø 36
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	160 / 80
Operating temperature (°C)	-40 ... +80
Protection class	IP65
Type of connection	Cable / connector
Max. resolution	4096 / 8192 (25 bits)

Supply voltage (V DC)	10 ... 30
Output circuit	SSI / Canopen
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

# ENCODER

## Heavy-duty Encoder

- Metal housing, compact structure
- The encoder can choose two signal outputs to meet the redundancy requirements
- Heavy-duty structure design, with excellent mechanical properties
- Mechanical and electronic overspeed switches are optional
- The integrated structure design of encoder and overspeed switch is easy to install

### Picture

Heavy-duty incremental encoder EV88

### Mechanical Parameters

Shaft diameter (mm)	Ø 16G7
Housing diameter (mm)	Ø 88
Max. speed (rpm)	3000
Load capacity (radial / axial) [N]	200 / 100
Operating temperature (°C)	-40 ... +80
Protection class	IP65
Type of connection	Cable / connector
Max. resolution	2048 ppr

### Electrical Parameters

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Output circuit	TTL / HTL ...
Product features	Aluminium alloy housing
	Compact structure
	Anti-electromagnetic interference
	Suitable for heavy electric machinery

Heavy-duty hollow shaft encoder with overspeed switch EVR100P

Shaft diameter (mm)	Ø 25H7 / Ø 30H7 / Ø 38H7 / Ø 40H7 / Ø 45H7
Housing diameter (mm)	Ø 98
Max. speed (rpm)	12000 (IP64); 6000 (IP66)
Load capacity (radial / axial) [N]	200 / 100
Operating temperature (°C)	-20 ... +90
Protection class	IP66
Type of connection	Cable / connector

Supply voltage (V DC)	10 ... 30
Output circuit	TTL / HTL ...
Product features	Metal housing
	Good compatibility
	High protection degree

Heavy-duty encoder HV115A

Shaft diameter (mm)	Ø 11g6
Housing diameter (mm)	Ø 115
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	250 / 150
Operating temperature (°C)	-20 ... +80
Protection class	IP66
Type of connection	Waterproof terminal box
Max. resolution	2048 ppr

Supply voltage (V DC)	5 ... 30
Pulse frequency (kHz)	200
Output circuit	TTL / HTL...
Product features	Metal housing
	High protection degree
	Anti-electromagnetic interference
	Suitable for heavy electric machinery
	Double incremental output available

# Heavy-duty Encoder

- Metal housing, compact structure
- The encoder can choose two signal outputs to meet the redundancy requirements
- Heavy-duty structure design, with excellent mechanical properties
- Mechanical and electronic overspeed switches are optional
- The integrated structure design of encoder and overspeed switch is easy to install

## Picture

Heavy-duty encoder HV115R

## Mechanical Characteristics

Shaft diameter (mm)	Ø 16 / Ø 17 / Ø 20H7
Housing diameter (mm)	Ø 115
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	200 / 100
Operating temperature (°C)	-20 ... +80
Protection class	IP66
Type of connection	Waterproof terminal box
Max. resolution	2048 ppr

## Electrical Characteristics

Supply voltage (V DC)	5 ... 30
Pulse frequency (kHz)	200
Output circuit	TTL / HTL...
Product features	Metal housing
	High protection degree
	Anti-electromagnetic interference
	Suitable for heavy electric machinery
	Double incremental output available

Heavy-duty high protection switch MVL115

Shaft diameter (mm)	Ø 11g6 / Ø 16 / Ø 17 / Ø 20H7
Housing diameter (mm)	Ø 115
Max. speed (rpm)	3000
Load capacity (radial / axial) [N]	250 / 150
Operating temperature (°C)	-20 ... +80
Protection class	IP65
Type of connection	Cable / connector

Supply voltage (V DC)	10 ... 30
Output circuit	TTL / HTL ...
Product features	Metal housing
	Good compatibility
	High protection degree

Heavy-duty Profibus absolute multiturn encoder PVM115

Shaft diameter (mm)	Ø 14
Housing diameter (mm)	Ø 115
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	160 / 80
Operating temperature (°C)	-40 ... +80
Protection class	IP66
Type of connection	Cable / connector
Max. resolution	4096 / 8192 (25 bits)

Supply voltage (V DC)	10 ... 30
Output circuit	Profibus-DP
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution
	Suitable for measuring angle

# ENCODE

## Special Application Encoder

- Meets ExdIIC T4 explosion-proof standard
- All stainless steel housing, better impact resistance
- Multiple output protocols are available
- Shaft type, shaft sleeve type installation mode is optional
- All metal stainless steel housing to meet the requirements of corrosion resistance

### Picture

Explosion-proof shaft incremental encoder EXI80A

### Mechanical Characteristics

Shaft diameter (mm)	Ø 8g6 / Ø 10g6 / Ø 12g6
Housing diameter (mm)	Ø 80
Max. speed (rpm)	6000
Load capacity (radial/axial) [N]	200 / 200
Operating temperature (°C)	-20 ... +80
Protection class	IP66
Type of connection	Cable
Max. resolution	5000 ppr

### Electrical Characteristics

Supply voltage (V DC)	5 ... 30
Pulse frequency (kHz)	800
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution

Explosion-proof hollow shaft incremental encoder EXI80P

Shaft diameter (mm)	Ø 8gH7 / Ø 10H7 / Ø 12H7
Housing diameter (mm)	Ø 84
Max. speed (rpm)	6000
Load capacity (radial/axial) [N]	200/200
Operating temperature (°C)	-20 ... +80
Protection class	IP66
Type of connection	Cable
Max. resolution	5000 ppr

Supply voltage (V DC)	5 ... 30
Pulse frequency (kHz)	800
Product features	Metal housing
	Good compatibility
	High protection degree
	High resolution

Explosion-proof shaft absolute singleturn encoder EXA80A

Shaft diameter (mm)	Ø 8g6 / Ø 10g6 / Ø 12g6
Housing diameter (mm)	Ø 80
Max. speed (rpm)	6000
Load capacity (radial/axial) [N]	200 / 100
Operating temperature (°C)	-30 ... +80
Protection class	IP66
Type of connection	Cable
Max. resolution	8192 ppr

Supply voltage (V DC)	5 ... 30
Pulse frequency (Hz)	1 M
Output circuit	SSI / Parallel
Product features	Metal housing
	High protection degree
	High resolution

# Special Application Encoder

- Meets ExdIIC T4 explosion-proof standard
- All stainless steel housing, better impact resistance
- Multiple output protocols are available
- Shaft type, shaft sleeve type installation mode is optional
- All metal stainless steel housing to meet the requirements of corrosion resistance

## Picture

Explosion-proof shaft absolute multiturn encoder EXA80A

## Mechanical Parameters

Shaft diameter (mm)	Ø 14g6
Housing diameter (mm)	Ø 80
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	200/100
Operating temperature (°C)	-40 ... +80
Protection class	IP66
Type of connection	Cable / connector
Max. resolution	8192 ppr

## Electrical Parameters

Supply voltage (V DC)	5 ... 30
Pulse frequency (Hz)	12 M
Output circuit	SSI / Profinet / Profibus-DP
Product features	Metal housing
	High protection degree
	High resolution

Explosion-proof hollow shaft absolute multiturn encoder EXA80P

Shaft diameter (mm)	Ø 14H7
Housing diameter (mm)	Ø 80
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	200 / 100
Operating temperature (°C)	-40 ... +80
Protection class	IP66
Type of connection	Cable / connector
Max. resolution	8192 ppr

Supply voltage (V DC)	5 ... 30
Pulse frequency (Hz)	12 M
Output circuit	SSI / Profinet / Profibus-DP
Product features	Aluminium alloy housing
	Compact structure
	High resolution

Explosion-proof hollow shaft incremental encoder EXI130P

Shaft diameter (mm)	Ø 25gH7 / Ø 25.4H7 / Ø 28H7 / Ø 30H7
Housing diameter (mm)	Ø 136
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	300/100
Operating temperature (°C)	-20 ... +80
Protection class	IP66
Type of connection	Cable

Supply voltage (V DC)	10 ... 30
Output circuit	HTL
Product features	Metal housing
	Good compatibility
	High protection degree

Stainless steel corrosion-resistant encoder ESS58P

Shaft diameter (mm)	Ø 6g6 / Ø 8g6 / Ø 10g6
Housing diameter (mm)	Ø 58
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	120/60
Operating temperature (°C)	-20 ... +110
Protection class	IP64, IP66 (optional)
Type of connection	Cable / connector
Max. resolution	5000 ppr

Supply voltage (V DC)	10 ... 30
Pulse frequency (kHz)	300
Product features	Stainless steel housing
	Various installation methods
	are available
	High protection degree

# ENCODER

## Draw Wire Mechanics

- High protection level, meet the harsh conditions
- High repetition accuracy up to 0.05%
- Various lengths are available to meet different needs
- A variety of flanged encoders are available

### Picture

SW-MW

### Mechanical Parameters

Measuring range	Max.3 m
Operating temperature (°C)	IP54
Operating temperature (°C)	-25 ... +85
Wire material	Stainless steel
Suitable for measuring angle	1000 mm/s
Excellent mechanical structure properties	Aluminium alloy
Linearity	0.05%FS
Reproducibility	0.01%

SWL-MWL

Measuring range	Max.15 m
Operating temperature (°C)	IP54
Operating temperature (°C)	-25 ... +85
Wire material	Stainless steel
Suitable for measuring angle	2000 mm/s
Excellent mechanical structure properties	Aluminium alloy
Linearity	0.05%FS
Reproducibility	0.01%

SD-MD-LD

Measuring range	Max.15 m
Operating temperature (°C)	IP64
Operating temperature (°C)	-30 ... +70
Wire material	Stainless steel
Suitable for measuring angle	4000 mm/s
Excellent mechanical structure properties	Aluminium alloy
Linearity	0.1%FS

# Servo encoder

- Special chip processing technology helps the servo drive system to reduce torque ripple and improve the dynamic performance of the system
- Set high precision, high speed two features in one, ensure high-speed servo system to achieve perfect control
- BISS-C protocol, which does not involve development cost in application, two-way synchronous communication, and the maximum communication rate can reach 10MHz
- The compact structure design greatly reduces the installation space requirement
- NRZ protocol based on 485 hardware interface, hardware interface for power supply and communication line, can achieve alarm reading and built-in EEPROM function

## Picture

Servo incremental encoder  
ESY35P

## Mechanical Parameters

Shaft diameter (mm)	Ø 9 - 1:10 cone shaft
Housing diameter (mm)	Ø 35
Max. speed (rpm)	6000
Load capacity (radial / axial) [N]	50 / 25
Operating temperature (°C)	-20 ... +85
Protection class	IP40
Type of connection	Cable
Max. resolution	2500 ppr

## Electrical Parameters

Supply voltage (V DC)	5
Pulse frequency (kHz)	300
Output circuit	TTL
Product features	Plastic housing
	Good compatibility
	Ø 9 hollow shaft
	High resolution
	Servo-specific

Servo incremental encoder  
ESY48P

Shaft diameter (mm)	Ø 9 - 1:10 cone shaft
Housing diameter (mm)	Ø 48
Max. speed (rpm)	6000
