ML Series Overview

Rail/Housing

SIMO® process ensures precision mounting, accurate installation and lightweight composition. Ceramic Coated Body for corrosion resistance and long life.

Nut

- Brass Inserts for system mounting and integrity.
- Built-in magnet accommodates home, limit and position sensors.
- Anti-Backlash Nut (Optional) for applications which require high bi-directional accuracy and repeatability.

Motor

Stepper motors available in standard NEMA 11, 14, 17, 23, metric frame sizes or add your own. Servo motors available in 40 and 60 mm motors.

Lead Screw

Large diameter, antifriction coated screw allows for longer lengths by decreasing screw whip and increasing column strength. 1 mm, 2 mm, 5 mm, 10 mm, 12 mm, 16 mm, 25 mm, and 38 mm leads.

"Dovetail" Style Carriage

PTFE polymer material has fourteen plain bearing surfaces providing low friction for smooth and quiet linear motion. Notched "dovetail" carriage provides easier alignment and assembly. Features extra mounting holes for ease of installation and multi-axis assemblies.

Linear Guide Supports

Provide increased load and moment capacities and overall rigidity to the system. Available single or dual rails with one or two runnerblocks per rail.

Dovetail Clamps

Dovetail Clamps secure unit on all four surfaces. Two screw design helps ensure quick and easy alignment during installation.

Seal Strip

Ultra-wear-resistant MDS nylon prevents particulates or contaminants from entering or exiting actuator.

Thrust Bearings

Duplexed back to back installation of deep groove ball bearings provides high stiffness and allows for increased thrust loads, rotational speed and repeatability.

Internal Coupling

Rigid polymer insert coupling for increased smoothness and minimal backlash.

Motor Mount

Specially constructed with an optimized length, resulting in an overall shorter system with PBC Linear™ brand stepper motors.

Motor Mount Adapter (MLC)

Adapter plate designed to fit any manufacturer's motor. Compensates for variations in pilot diameter, depth, shaft diameter, length and mounting screw patterns.

ML Series Linear Actuators

ML Advantage

- **Small, Compact Profile** - 28 x 32 mm
- **Patent Pending SIMO® Process**
Ensures precision mounting, accurate installation and lightweight composition.
- **Lead Screw Driven** - High accuracy and precise repeatability
- **Multi-Axis Configurations**
- **Long Travel Lengths** - Up to 650 mm

MLC Series Motor Mount Only

Specially designed motor mounts and couplings for easy mounting and extended life.

MLD Series Hand Driven (Shaft or Knob)

Adjustable hand operated knob and brake for precision control.

MLB Series Motor Driven

Pre-mounted stepper or servo motors.

**Machine tools are built on precision machined castings or weldments.
Why shouldn't your actuator be built the same?**

PBC Linear has revolutionized traditional machining with the patent pending SIMO™ (Simultaneous Integral Milling Operation).

SIMO process uses synchronized cutters, eliminating built-in extrusion variances by machining all critical edges concurrently in one pass. This ensures tight tolerances, limited variance and a remarkably straight and repeatable surface at negligible additional cost!

Typical Aluminum Extrusion Issues

The typical aluminum extrusion process produces a natural bow, twist and variance. Costly straightening and aligning is traditionally used to combat this variance, resulting in a semi-straight aluminum extrusion that drives the cost up.

As tolerances get tighter, the cost of machining with conventional processes increases dramatically over the SIMO process.

- Patent Pending Machining Process
- High Precision Mounting Surfaces
- Tight Tolerances $\pm 0.025\text{mm}$ (0.001 in)

ML Advantage

Using the machine tooled precision and rigid surfaces sustained by the SIMO™ process, the ML's bridge gantry design can support 1 or 2 linear guides on the sides of the ML.

Optional Single or Dual Linear Guide Supports

These supports work together to increase load capacities and sustain stability while utilizing re-circulating caged-ball technology to provide smooth and quiet linear motion guidance.

Technical Data

ML SERIES - Carriage only

Size		mm	28 x 32	in	1.10 x 1.26

Dimensional Data

CARRIAGE WITH DOVETAIL

RECOMMENDED OVERTRAVEL PER SIDE

Knob or Hand Crank = 5mm
Stepper Motor = 10mm
Servo Motor = 20mm

How to Calculate Body Length

- 1) Enter 19 mm
- 2) Select (5, 10 or 20 mm) for overtravel on idle end (See recommended overtravel above.)
- 3) Specify stroke length in mm
- 4) Select (51 or 71 mm) for carriage length
- 5) Select (5, 10 or 20 mm) for overtravel on idle end (See recommended overtravel above.)
- 6) Add amounts together and enter SUBTOTAL
- 7) Enter TOTAL BODY LENGTH (Round to nearest 10 mm)
- 8) When ORDERING enter TOTAL BODY LENGTH in BODY LENGTH column.

BODY LENGTH CALCULATION TABLE		Example
IDLE END CAP = 19mm	19	19 ← 1
OVERTRAVEL IDLE END (5, 10 or 20mm)		10 ← 2
STROKE LENGTH		155 ← 3
CARRIAGE LENGTH (51 or 71mm)		71 ← 4
OVERTRAVEL DRIVE END (5, 10 or 20mm)		10 ← 5
(Add Amounts 1-5) + ENTER SUBTOTAL (mm) =		265 ← 6
TOTAL BODY LENGTH (Round Subtotal to nearest 10mm)		270 ← 7

Performance Data

The load rating and system speed must both be accounted for when sizing a lead screw system. The nut threads and screw threads form a plane bearing system.

The PV limit of a polymer material is the point at which friction-generated heat can no longer be expelled at a rate to prevent the material from overheating. Such overheating while under stress can cause permanent deformation of the material. Ignoring how the system's speed and loading relate to the nut material's PV rating can lead to dramatically shorter thread life. The primary modes of failure for lead screw systems are wear and PV. By staying within the PV envelope of the screw and nut, one can ensure long life of the nut without premature wear.

Torque to Raise Load

$$T_L \text{ (Nm)} = \frac{\text{Load (N)} \times \text{Lead (mm)}}{2\pi \times \text{Efficiency} \times 1000}$$

$$T_L \text{ (in-lbf)} = \frac{\text{Load (lbf)} \times \text{Lead (in)}}{2\pi \times \text{Efficiency}}$$

Performance Characteristics		Lead Screw mm (in)				
		38 (1.50)	25 (1.00)	10 (.400)	3 (.125)	1 (.039)
Max, Travel Speed	mm/s (in/s)	1905 (75)	1270 (50)	508 (20)	159 (6.25)	50 (1.95)
Screw Diameter	mm (in)	10 (0.375)	10 (0.375)	10 (0.375)	10 (0.375)	10 (0.375)
Screw Efficiency (See formula to left)		81%	82%	77%	57%	26%

Ordering Options

**ML Options Provide You
with a Perfect Fit System**

Lead Screw

- Large 10 mm diameter lead screw reduces whip and increases column strength allowing longer stroke lengths
- Lead options*: 1, 2, 5, 10, 12, 16 and 25 mm.
3 mm (0.125"), 10 mm (0.400"), 25 mm (1"), 38 (1.5")
*Contact manufacturer for other available sizes
- **Nominal Lead Screw Diameter** = 10 mm (0.375")
- **Screw Inertia** = $4.169 \times 10^{-6} \text{ kg-m}^2/\text{m}$
 $1.5 \times 10^{-5} \text{ oz.-in.}^2/\text{in.}$
- **Lead Screw Length** = Body Length + 32.27 mm

Nut Type

- Standard nut $F_x=262 \text{ N}$ (60 lb) or anti-backlash nut $F_x=44 \text{ N}$ (10 lb)
- Optional anti-backlash nut - ideal in applications requiring high bi-directional accuracy and repeatability
- Magnet is built-in for use with home and position sensors
- Anti-Backlash light pre-load Nut limits F_x linear thrust force capacity

Seal Strip with Carriage Bracket

- Ultra wear-resistant molybdenum disulfide impregnated nylon
- Prevents debris from entering or exiting actuator
- Seal strip is 725mm in length (Can be cut shorter using sharp pair of scissors.)

ML Actuator Build, Mount, Use

Build Your ML Actuator

Step 1

Configure Your System Axis

- Determine if you need an external linear guide for support (p 10)
- Calculate the body length (p 5)

Step 2

Choose the Drive Method

- Motor pre-mounted and tested by PBC Linear? ➔ MLB (p 16)
- Ready to mount your own motor? ➔ MLC (p 12)
- Driven by hand? ➔ MLD (p 14)

Step 3

Choose How to Mount Axis

- Choose dovetail clamps or riser plates (Use riser plates with NEMA 17 and 23 motors) (p 21)

Step 4

Choose End of Travel and Home Limit Switches/Sensors

- Determine mounting type/location (bracket type)
- Choose from list of compatible sensors

Repeat 1-5 for Each Axis

Step 5

Order Your System

**1-800-962-8979 or
1-815-389-5600**

Questions?
Call an Application Engineer
1-888-777-0556

Multi-Axis Mounting

ML actuators are designed to perform well in X Y and other Cartesian arrangements. The actuator body forms a strong beam with higher moment loading capacity. Special dovetail slots on all sides allow the actuators to be mounted on their bottom surface or on either side.

X Y

Carriage brackets and special wedge mounting clamps allow for precise and rigid mounting arrangements. Linear guides can be installed on one or both sides of the actuator with one or two runner blocks on each rail for greater rigidity in gantry applications.

Multi-axis gantries can also be created by combining the ML with other actuators such as the PL or MT Series.

X Z

Superior Multi-Axis Mounting for Compact Applications

- Medical
- Biotech
- Instrument Automation
- Packaging
- Pick & Place
- Semi-conductor
- Scanning

X Y Z

**MULTI-AXIS
MTB Series
with MLB**

ML Applications

The ML miniature actuator has a combination of compactness and (60 lbf) 265 N pound thrust power gives this actuator an edge for automation applications where space is critical. Plus, the SIMO® machined rail surface and zero backlash lead screw assembly ensures accuracy and precision for syringe pumps and optical control applications.

Linear Guide Supports

The ML series features the unique option for dual external linear guides (also available with single linear guide option). These re-circulating ball runner blocks assure high speed precision as well as enhanced load capacities and stability.

Support Options to Create Variable Levels of Performance

Technical Data Linear Guide Supports				(1) Single		(2) Dual			(1) Single		(2) Dual	
				# of runner blocks on each guide					# of runner blocks on each guide			
				1	2	1	2		1	2	1	2

		My		1.8	5.0	3.6	10		16	44	32	88
		Mz		1.8	5.0	3.6	10		16	44	32	88
Bending Moment of Inertia (Second Moment of Area)		Iy	cm ⁴	2.4	2.4	2.4	2.4	in ⁴	0.058	0.058	0.058	0.058
		Iz		4.4	4.4	4.4	4.4		0.106	0.106	0.106	0.106
Base Weight without Motor			Kg	0.127	0.136	0.195	0.205	lbf	0.280	0.300	0.430	0.450
Add for 100 mm of Stroke				0.180	0.180	0.210	0.21		0.400	0.400	0.460	0.460
Total Carriage Mass			Kg	0.109	0.117	0.159	0.175	lbf	0.240	0.257	0.350	0.385
Coefficient of Friction				0.190		0.010			0.190		0.010	

Note:

1. Moment arms for calculating moments should be measured from the center of the extrusion
2. Limit switches must be used in order to prevent the carriage from contacting the actuator end blocks, resulting in damage
3. Servo drive system, recommended overtravel of 20 mm
4. Stepper motors or manual hand cranks system, add 5 mm of over-travel

Dimensional Data

Single Linear Guide Supports

Dual Linear Guide Supports

MLC Series (Motor Mount Only)

- Includes motor mount with coupling
- Includes motor spacer (if required)
- Precision machined body
- Small, compact design
- Smooth and quiet operation
- High acceleration, speed and rigidity

PBC Linear stepper motors do not require a spacer due to the shorter shaft length. A spacer is required for any other manufacturer's motor. The spacer compensates for several dimensions which commonly vary amongst motor manufacturers (shaft diameter, shaft length, pilot diameter, pilot depth, bolt hole diameter, bolt type).

Stepper Motor Options

PBC Linear brand stepper motors are designed to reduce length in the ML actuator. Single, double and triple stack motors are available in each size. See page 18 for dimensional data.

Motor Locations

Using universal motor mounts, PBC Linear's ML series mini-actuators give our customers the freedom for limitless mounting options. Straight (in-line), top, bottom or side motor mounting allows the ML series to fit seamlessly into any specified application.

NOTE: Motor coupling assembly (hubs & disk) are included in MLB & MLC Series actuators. One hub of the coupling is integral to the lead screw drive system. Alternate coupling styles are not available

Ordering Accessories

When ordering ML accessories, use the part number (P/N) to specify which accessory you want when placing your ML actuator order. If you have technical question contact a PBC Linear Application Engineer at at **1-800-962-8979**.

Motor Mount Assembly - Replacement Parts

Motor Mount Assembly - NEMA 11/14/17

Includes:

- (1) Motor Mount Cover
- (4) BHCS M3 x 0.5 x 6 mm

P/N: **MLB028A-BMMC-KIT**

Includes:

- (1) Motor Mount Bracket
- (3) SHCS M3 x 0.5 x 8 mm

P/N: **MLB028A-MTRMNT-UNI-ASY-KIT**

Includes:

- (1) Pulley Belt (3 mm pitch)
- (2) Timing Pulley, 9 mm x 5 mm

P/N: **6140032**

P/N: **6140035**

Motor Mount Assembly - NEMA 23

Includes:

- (1) Motor Mount Cover
- (4) BHCS M3 x 0.5 x 8 mm

P/N: **MLB028A-BMMC-23-KIT**

Includes:

- (1) Motor Mount Bracket
- (3) SHCS M5 x 0.8 x 8 mm

P/N: **MLB028A-MTRMNT-UNI-ASY-23-KIT**

Includes:

- (1) Pulley Belt (3 mm pitch)
- (1) Timing Pulley, 9 mm x 6.35 mm
- (1) Timing Pulley, 9 mm x 5 mm

P/N: **6140032**

P/N: **6140039**

P/N: **6140035**

Mounting Hardware (Clamps, Plates & Sensor Kits)

Dovetail Clamps

Two screw design helps ensure quick and easy alignment during installation.

Kit Includes:

- (2) M3 Dovetail Clamp
- (4) M3 x 10mm SHCS

Single Dovetail Clamp Only
Dovetail Clamp Kit

P/N: **MLA028A-HDC-M3**
P/N: **MLA028A-HDC-M3-KIT**

Riser Plates

Includes:

- 1. (4) M3 x 10mm SHCS
- 2. (2) M3 Dovetail Clamp
- 3. (2) M5 x 16mm SHCS
- 4. (1) 8mm or 15mm Riser Plate

6X M3 X0.5 - 6H ∇ 6.5
MAX. SCREW TORQUE = .8 N-m (7 in-lbf)

Recommended for NEMA 14 & 17 Motor

8 mm Riser Plate only	P/N: MLA028A-RSRPLT-08
8 mm Riser Plate Kit	P/N: MLA028A-RSRPLT-08 -KIT

Recommended for NEMA 23 Motor

15 mm Riser Plate only	P/N: MLA028A-RSRPLT-15
15 mm Riser Plate Kit	P/N: MLA028A-RSRPLT-15-KIT

Riser Plate Sensor Kit

Kit Includes:

- (1) Riser plate (8 or 15mm)
- (2) Dovetail clamps
- (4) M3 x 10mm screws
- (1) M3 x 12mm screw
- (1) M3 x 6mm screw
- (2) M5 x 16mm screw (optional)

Compatible Sensors: OM-E2S-W2 style

Typical Applications: ML Actuator gantry's with (2) linear guides

Riser Plate Sensor Kit	P/N: MLA028A-RSRPLT-08A-KIT
Riser Plate Sensor Kit	P/N: MLA028A-RSRPLT-15A-KIT

Linear Guide Sensor Kit

Kit Includes:

- (1) Bracket
- (1) OM-Y92E-C1R6 Bracket
- (3) M3 X 4mm screws
- (1) M4 X 5mm set screw
- (1) Flag, 5mm sensing distance

Compatible Sensors: OM-E2S-Q1 style

Typical Applications: ML Actuators with one or two linear guide(s)

Linear Guide Sensor Kit	P/N: MLB028A-BRKTA-KIT
-------------------------	-------------------------------

T-Slot Sensor Kit

Kit Includes:

- (1) Bracket
- (1) M2 X 8mm screw
- (1) M2 nut

Compatible Sensors: PBC Linear 6200XXX Series Sensors

Typical Applications: ML Actuator with zero or one linear guide(s)

T-Slot Sensor Kit	P/N: MLA028A-SENADT-KIT
-------------------	--------------------------------

*** Note:** Sensor mounting kits do not include a sensor.
The appropriate sensor should be ordered separately.

Sensing surface		Front	Top	Front	Top
Sensing distance		1.6 mm ± 15%	2.5 mm ± 15%	1.6 mm ± 15%	2.5 mm ± 15%
Set distance		0 to 1.2 mm	0 to 1.9 mm	0 to 1.2 mm	0 to 1.9 mm
Differential travel		10% MAX of sensing distance			
Detectable object type		Ferrous metal			
Standard target object		Iron, 12 x 12 x 1 mm	Iron, 15 x 15 x 1 mm	Iron, 12 x 12 x 1 mm	Iron, 15 x 15 x 1 mm
Response frequency (see note)		1 kHz min.			
Power supply voltage (operating voltage range)		12 to 24V DC, ripple (p-p): 10% max., (10 to 30V DC)			
Current Consumption		13 mA max. at 24 VDC (no-load)			
Operation Mode (with sensing object approaching)		OM-E2S- _ 3 models: NO OM-E2S- _ 4 models NC			
Control Output	Load Current	NPN open collector output 50 mA max. (30 V DC max)		PNP open collector output 50 mA max. (30 V DC max.)	
	Residual voltage	1.0 V max. with a load current of 50 mA and a cable length of 1 m			
Indicator		Operation indicator (orange)			
Protection Circuits		Reverse polarity connection and surge absorber			
Ambient temperature	Operating	-25°C to 70°C (-13°F to 158°F) with no icing or condensation			
	Storage	-40°C to 85°C (-40°F to 185° F) with no icing or condensation			
Ambient humidity	Operating	35% to 90% (with no condensation)			
	Storage	35% to 95% (with no condensation)			
Temperature influence		± 15% max. of sensing distance at 23° in the temperature range of -25 to 70° C			
Voltage Influence		± 2.5% MAX of sensing distance in rated voltage range ± 10%			
Insulation resistance		50 M MIN (500V VDC) between current carry parts and case			
Dielectric strength		1,000 VAC, 50/60 Hz for 1 min between current carry parts and case			
Vibration resistance		Destruction: 10 to 55 Hz, 1.0 mm double amplitude for 2 hours each in X, Y and Z directions			
Shock resistance		Destruction: 500 m/s² (1640 ft/s²) 3 times each in X, Y and Z directions			
Connection Method		Pre-wired standard length 1 m (39.37 in)			
Weight (packed state)		Approx. 10 g (0.35 oz)			
Material/Case		Polyarylate resin			

Maintenance Kit System Parts • Seal Strip Kit

Seal strips are engineered to last the life of the system. In the event that the strip becomes damaged by environmental contamination, PBC Linear offers a replacement seal strip kit.

Kit Includes: (Carriage bracket sold separately.)

- (1) Seal Strip - Ultra-wear resistant MDS nylon
- (1) Retainer Bracket
- (1) Adjuster Bracket
- (3) PHC M2 x 0.4 x 5 mm
- (1) Hexagon Nut, M2 x 0.4
- (4) Bearings

Seal Strip Kit

P/N: **MLA028A-SSAR-KIT**

Seal strip is 725 mm in length and can be cut shorter using sharp pair of scissors.
