January 16, 2019

Effective December 19, 2018, Emerson's AVENTICS has entered into a distribution agreement with Flotronics Automation LLC.

Emerson's AVENTICS is one of the world's leading manufacturers of pneumatic components, systems, and customer-specific industrial automation applications. AVENTICS products and applications fulfill customer's needs in multiple sectors including factory automation, commercial vehicles, food and beverage packaging, railway technology, energy, and marine propulsion controls. As AVENTICS continues to grow, so does our need for outstanding distribution partners who serve industrial customers and markets. Flotronics' location in Clarkston, MI and industry focus makes them an ideal partner for AVENTICS. As we focus on expanding our distribution network, companies like Flotronics will enable us to better respond to the needs of our customers and support the regional markets (the state of Michigan) through technical expertise, local stock and value-added capabilities.

Flotronics has been a leader in the automation industry since 1986 serving the industry with top-of-the-line in-class service and high-quality automation equipment. They provide automation products from the most progressive manufacturers in the fluid power industry to solve the intricate process or machinery needs of their customers. With their technical sales staff, application engineering department and integration/manufacturing capabilities, their goal is to help their customers design and develop the correct solution for their industrial automation applications. From basic component sales to customized engineered solutions, Flotronics serve their customers as a valued partner.
