

Protective Barriers are an effective way to help prevent the spread of germs in public places. They help block airborne particles and create a boundary for social distancing which also reduces the number of germs spread by physical contact.

Flotronics Automation is now taking it's product knowledge of barrier systems to offer versatile protective barriers for offices, plants, schools, restaurants or where ever barriers are needed. Whether you need a simple tabletop barrier or a tailor fit wall separator, your options are limitless. Just let us know what solution you need.
